

# PermaPROTECT Mould Wash Concentrate

## Description

A concentrated fungicidal cleaner and surface biocide for amateur and professional use against mould fungi, mildew and algae on internal and external surfaces such as masonry, tiles, wood and painted surfaces.

Used mainly as a pre – wash to cleanse surfaces before the application of PermaPROTECT Anti Mould and Anti Condensation coatings as well as a general biocidal cleaner

## Typical Uses

- Kitchens
- Bedrooms
- Utility rooms
- Bathrooms
- Lintels over doors and windows
- Industrial applications

## Advantages of Use

- Easy to use
- Highly effective fungicidal wash
- Removes mould fungi, mildew and algae on internal and external surfaces
- Can be used on masonry, tiles, wood and painted surfaces
- Suitable for amateur and professional use
- Can be used as a pre wash as well as a general biocidal cleaner

## Technical Details

<i>Mould Wash Concentrate</i>	<b>Technical Details</b>
<i>Material</i>	Water dilutable biocidal wash
<i>Size of bucket</i>	250ml bottle
<i>Colour</i>	Clear liquid
<i>Mixed density</i>	1.02 – 1.05
<i>Temp range</i>	
<i>Number of coats</i>	1 or 2 in badly soiled areas
<i>Drying time</i>	1-4 hours (temp depending)
<i>Coverage</i>	10 – 12m <sup>2</sup> /L

## Substrate Preparation

Preparation is similar to normal good decorative practice.

- Protect non target surfaces with dust sheets.
- Prepare surfaces by removing non washable and loose material e.g. flaking paint, grease, dirt, mould or wallpaper
- Make good any surface defects and run down to a smooth surface

## Mixing

Dilute 1 part PermaPROTECT Mould Wash Concentrate with 19 parts Water (whole container makes 5 litres of ready to use product)

## Application

- Wash down the prepared area with the diluted PermaPROTECT Mould Wash Concentrate using a sponge, scrubbing brush or cloth
- Allow to dry thoroughly. Apply a second wash in badly soiled areas and allow to dry
- Prime any bare areas of plaster and woodwork with PermaPROTECT Antimould Paint, thinned up to 10% with water if necessary. On stained or glossy surfaces use a universal anti stain primer
- Apply appropriate PermaPROTECT Antimould or Anticondensation coating

## Packaging

250ml bottle

## Coverage

- 10 – 12m<sup>2</sup>/litre when diluted depending on the porosity and roughness of the surface

## Handling

Wear suitable gloves (neoprene / PVC, nitrile or plastic), coveralls and eye/face protection.

## Storage and Shelf Life

Store upright in original container, tightly closed, off the ground, out of reach of children and in dry and frost-free conditions between 5°C to 25°C. 12 months when unopened, undamaged and stored correctly.

## Health and Safety

Full health and safety data are given in the Product Safety Data Sheet.
